

## Exam revision

Production Aids, Jigs & Templates

Production of Materials

PCB production & surface treatments

## Exam revision

Properties of Materials

Complaint Materials

Timber, Metals, polymers & textiles

Electronic & Mechanical Systems

## Exam revision

Sustainability & Social Issues

Products in Society

Production Systems – CAD/CAM

## Exam revision

Uses of Wood, Metals & Polymers

Looking at the work of others

Understanding users needs

## NEA: Section F

Testing all of the prototypes against the design specification

Reference that there is experimenting, modifying & evaluation

## NEA: Section E

High quality & accurate final prototype which meets the design brief & design specification

## NEA: Section D

Development of ideas using 2D,3D & CAD techniques

Excellent modelling/testing

## NEA: Section C

Different design approaches included

Ideas that show flair, originality & risk taking

## NEA: Section B

Design Brief – developed from research:

Design Specifications including justifications which are: Linked to research, Measurable, Relate to the brief & Contextual Challenge and Addresses needs/wants of user

## NEA: Section A

Explore the problem & opportunities of the Contextual Challenge

Clearly identify the expected User & Client
